

Cost Reduction Consultation & Optimization

Advanced Carrier Technologies' (ACT) CarrierCop® cost reduction consultation and optimization service performs a shipping cost analysis which will provide a comprehensive analysis of your current freight and parcel movements. The complete data workup allows us to consult and recommend cost reduction plans, along with assisting you in negotiations with all carriers to produce significant savings for your company.

100% Shared Savings:

- No upfront costs, minimums or purchase orders, no risk or cost to you to do business with us
- Typical savings of **10-30%**

Carrier and Cost Analysis:

- ACT will thoroughly analyze your current freight movements, including freight volumes, costs, traffic patterns, as well as a host of other variables for savings opportunities.

Consultation and Recommendations:

- Based on the analysis, ACT will make recommendations to reduce overall freight costs, establish appropriate service levels, and increase shipping efficiencies. Recommendations may include automation, alternative carriers, customized billing options, packaging changes and more.
- ACT will negotiate or assist you in negotiating a pricing program with your carriers to reduce costs and provide savings while maintaining or surpassing your overall transportation requirements.

~~SPEND MONEY~~
